

Taming A Monster Key Ring, Version 1.1

By **R. G. Sparber**

Protected by Creative Commons.¹

Almost every Monday, I help my friend Ed do building maintenance for a large facility. All door are locked. This means Ed must carry around a monster key ring.

I forgot to take a picture of his full ring but it is about four times larger than this stock picture. Finding the right key wastes a lot of time.

Uniquely marking keys only helps if you can reduce the number of keys to search.

The standard engineering solution is to divide and conquer. Each grouping of keys will have a unique set of spacers around it. They don't take up much room and Ed can instantly find each group.

I'm sure this ring will be full the next time I see him.

I welcome your comments and questions.
