

Making Your Lectric XP Serial Number Visible, Version 1.1

By **R. G. Sparber**

Protected by Creative Commons.¹

In bright light, I can barely make out the serial number on my XP. Usually, I don't care. But when I recently wanted to record it, it was annoying.

I put a dab of Elmer's white glue on my finger. It is water-soluble, so washes off.

Ah, now I can see the numbers.

If you have a white bike, you can probably mix the glue with something dark and get a similar result.

We use (school) chalk to improve the visibility: it comes in different colors; choose the color that gives enough contrast with the color of the painting.

Thanks Jan.

I welcome your comments and questions.

If you want me to contact you each time I publish an article, email me with "Subscribe" in the subject line. In the body of the email, please tell me if you are interested in metalworking, software plus electronics, kayaking, and/or the Lectric XP eBike so I can put you on the right distribution list.

If you are on a list and have had enough, email me "Unsubscribe" in the subject line. No hard feelings.
